EXPLANATION OF BIT AND AUGER TERMS

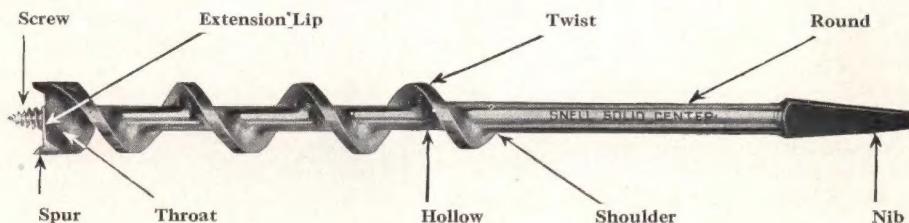

Ship Auger with Screw

Double Twist Machine Bit

Solid Center Auger Bit

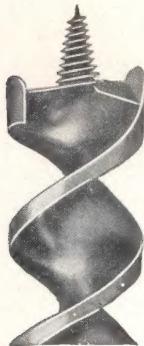

The Spur is a sharp projection, which extends down from the cutting edge on some types of bits; its function is to outline the hole in advance of the cutting edge, preparing the chip so that it can be lifted by the cutting edge.

The Side Lip frees the outer edge, while the cutting edge cuts and lifts the chip, leaving the sides of hole perfectly smooth.

On flat head type of bits, the side lip and cutting edge act in unison to cut and lift the chip.

TYPES OF BIT AND AUGER HEADS

As the formation of head has much to do with adaptability for different kinds of boring, the following descriptions of the different heads should be of service in determining the style best suited for the various uses.

Double Cutter, Double Twist

For general boring in all kinds of wood; bores easily, feeds rapidly, clears readily and cuts smoothly.

Has two cutting edges with double spurs and side lips; double thread screw; the best bit for carpenter and cabinet maker.

Star, Single Twist

Unequaled for rapid work and boring with the grain; cuts clean and frees chips easily; has single spur, single cutting edge and single thread screw.

For difficult boring in wet, green, very hard or knotty wood.

Extension Lip, Double Twist

Bores easily and cuts smooth hole; is adapted for general use and for those who desire particularly smooth, accurate boring as in furniture and cabinet work.

Has two cutting edges, extension lips and double thread screw.

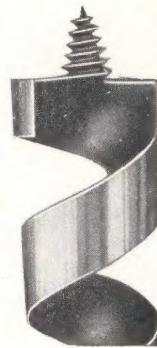

Solid Center, Extension Lip

Combines the desirable qualities of strength, free, easy cutting and good chip clearance.

Has two cutting edges with spurs of the extension lip type; pitch of screw and size of spurs properly proportioned so that the bit can do smooth, accurate boring.

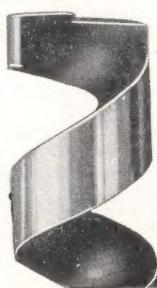

3/16 to 10/16 bits have double thread screws, larger sizes have single thread screws; recommended for electrical workers.

Ship Auger and Bit with Screw, Single Twist

Designed primarily for ship, car, trestle and heavy construction work and for boring to greater depths; recommended for strength, rigidity and free clearance.

Made with single cutting edge, one side lip and single thread screw. This permits easy cutting and also allows a good body of metal for sharpening and wear; best for use in pneumatic and electric boring machines.

Ship Auger and Bit With-out Screw, Single Twist

Used largely in deep boring and where it is necessary that hole be perfectly straight; being without point or screw, have little or no tendency to drift with or follow the grain of the wood; unequaled for wet, pitchy woods; also used largely in power boring machines.

Rapidity of Boring

This depends upon pitch of screw and is measured by the number of turns required to bore through one inch of wood; every Snell bit and auger is fitted with a pitch of screw that more than a century of experience has taught us is the best type of tool; illustrations above show both single and double thread screws; the single thread for rapid, positive work or when there is a tendency to fill up threads; the double thread for accurate and particularly fine work, as in furniture and cabinet making.

SNELL-CLARK EXPANSIVE BITS

SPECIAL TOOL STEEL—FULL POLISHED—ACCURATELY MADE

We Guarantee

That the Bit will bore accurately to the size indicated by the graduations on the Cutter when set to the mark on the Cap.
 That the Cutters will not creep or shift in boring.
 That the Cutters are made of best quality Tool Steel.
 That our Cutters are machined on all sides to fit perfectly and that our parts are made to standard size and are interchangeable. Stamping on Cutter and Cap is always uniform, so that Cutters can be replaced.

SNELL-CLARK

Small Size

With two cutters; one boring from $\frac{1}{2}$ to $\frac{7}{8}$ inch, and the other from $\frac{7}{8}$ to $1\frac{1}{2}$ inches.

No. 1	Small size; weight per dozen, 3 lbs.	Per Dozen \$18.00
<i>One in a carton, six cartons in a box</i>		

Large Size

With two cutters; one boring from $\frac{7}{8}$ to $1\frac{3}{4}$ inches, and the other from $1\frac{3}{4}$ to 3 inches.

No. 2	Large size; weight per dozen, 6 lbs.	Per Dozen \$26.00
<i>One in a carton, six cartons in a box</i>		

EXTRA CUTTERS

No. 2

No. 4

No. 1	Boring from $\frac{1}{2}$ to $\frac{7}{8}$ inches; weight per dozen, 1 ounce.	Per Dozen \$3.00
No. 2	Boring from $\frac{7}{8}$ to $1\frac{1}{2}$ inches; weight per dozen, 2 ounces.	3.75
No. 3	Boring from $\frac{7}{8}$ to $1\frac{3}{4}$ inches; weight per dozen, 12 ounces.	5.25
No. 4	Boring from $1\frac{3}{4}$ to 3 inches; weight per dozen, 1 lb.	6.00
No. 5	Boring from 3 to 4 inches; weight per dozen, $1\frac{1}{4}$ lbs.	9.00
No. 6	Boring from 4 to 5 inches; weight per dozen, $1\frac{1}{2}$ lbs.	12.00

EXTRA CAPS

Small caps for No. 1 expansive bits;	weight per dozen, 1 ounce.	Per Dozen \$1.44
Large caps for No. 2 expansive bits;	weight per dozen, 9 ounces.	1.80

EXTRA SCREWS

Small size screws for No. 1 expansive bits;	weight per dozen, 1 ounce.	Per Dozen \$0.60
Large size screws for No. 2 expansive bits;	weight per dozen, 4 ounces.	.70

SNELL-CLARK EXPANSIVE DOWEL BITS

SPECIAL TOOL STEEL—FULL POLISHED—ACCURATELY MADE

No. 1—One Cutter boring from $\frac{1}{2}$ to $\frac{7}{8}$ inch and the other from $\frac{7}{8}$ to $1\frac{1}{2}$ inches.No. 2—One Cutter boring from $\frac{7}{8}$ to $1\frac{3}{4}$ inches and the other from $1\frac{3}{4}$ to 3 inches.

No. 1	Small size; weight per dozen, $1\frac{1}{2}$ lbs.	Per Dozen \$18.00
<i>One in a carton, six cartons in a box</i>		

No. 2	Large size; weight per dozen, $4\frac{1}{2}$ lbs.	Per Dozen \$26.00
<i>One in a carton, six cartons in a box</i>		

SNELL SOLID CENTER AUGER BITS

No. 800

Forged from crucible steel; full polished, except nib. Superior to any other bit of this type; combines the desirable qualities of strength, free, easy cutting and good chip clearance; has two cutting edges with spurs of the extension lip type.

SNELL SOLID CENTER AUGER BITS

For Boring Hard Wood

No. 801

Forged from crucible steel; full polished, except nib. Similar to the No. 800, but made with flat head type; this construction results in fast, positive boring in hard wood, either with or against the grain.

BATES AUGER BITS

No. 100

A good quality cast steel auger bit, well known as a dependable wood-boring tool.

Approximate length of twist, $4\frac{1}{2}$ inches; approximate length over all, 8 inches.

SNELL AUGER BIT SETS IN COLUMBIA BOXES

Set of 13 Bits

This style box is used for auger bits in sets as listed below; it can be stood on end or laid flat; made of hard wood, oiled finish, and displays the bits to the best advantage; it is more convenient than other bit boxes.

Stock Assortments

Are specified below, although special assortments will be made up if ordered in sufficient quantity.

SNELL EXTRA AUGER BITS

Set No.	Quarters	Number of Bits Per Set	Weight Per Set	Per Set

SNELL AUGER BIT SETS IN CANVAS ROLLS

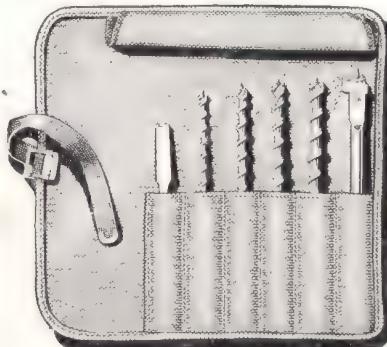

Made of heavy colored canvas with well-sewed, turned-in edges; lined with canton flannel and sewed to give a separate compartment for each bit, affording a simple and convenient means of protecting the bits from dampness and injury.

Set No.	Number of Bits Per Set	Weight Per Set	Per Set
232 $\frac{1}{2}$ R	SNELL EXTRA BITS; 13 bits, one each, 4 to 16-16ths, inclusive...	3 $\frac{3}{8}$ lbs.	\$8.50
332 $\frac{1}{2}$ R	SNELL EXTENSION LIP BITS; 13 bits, one each, 4 to 16-16ths, inclusive.....	3 $\frac{3}{4}$ lbs.	8.50
632 $\frac{1}{2}$ R	STAR BITS; 13 bits, one each, 4 to 16-16ths, inclusive.....	4 $\frac{5}{8}$ lbs.	8.50
832 $\frac{1}{2}$ R	SOLID CENTER BITS; 13 bits, one each, 4 to 16-16ths, inclusive.....	3 $\frac{3}{8}$ lbs.	8.50
132 $\frac{1}{2}$ R	BATES BITS; 13 bits, one each, 4 to 16-16ths, inclusive.....	3 $\frac{1}{2}$ lbs.	8.50

NOTE.—Sets of 6, 8 and 9 bits in canvas rolls will be furnished in any of the above styles; numbers, sizes and list prices are as for sets on preceding page, except the letter R is added to the number.

SNELL POCKET BIT SET IN CANVAS CASE

No. 888

This Snell Set comprises one Auger Bit each 4/16, 5/16, 6/16, 7/16; a Snell-Clark Expansive Bit, boring $\frac{1}{2}$ to $1\frac{1}{2}$ inches, and a Screw Driver Bit. In all a boring range is given from $\frac{1}{4}$ inch to $1\frac{1}{2}$ inches.

This Set may also be obtained with either a Rose Countersink or Screw Driver Bit.

All are of the Snell high quality special Tool Steel, full polished, accurately made, with parts of Expansive Bit interchangeable.

A well-made Dark Brown Canvas Case, lined with flannel, keeps these fine tools in proper shape.

No. 888. Pocket Bit Set, Weight Per Set, 13 ounces..... Per Set, \$3.50

SNELL "RED ROVER" ELECTRICIANS' BITS

Nos. 354, 355 and 356

Forged from crucible steel. Full polished. Red nibs.

Quickly and smoothly the cutting edge of this new bit follows the lead screw, boring a clean hole all the way through.

Without pressure the Red Rover does its work, leaving no rough or splintered surface.

No. 354

S N E L L P I N O R C R O S S - A R M B I T

No. 660 D

The 6 $\frac{1}{4}$ Snell Bit is designed for boring holes in cross-arms for Insulators. This tool is made especially for this work and the man who uses this bit praises it for its quick-boring and clean-cutting qualities. Like all Snell Bits these Construction Bits are thoroughly "tested in wood" before leaving our factory.

No. 660 D. Made in one size only 20/16. Length Over All 6 $\frac{1}{4}$ inches, Weight Per Dozen, 6 lbs..... Per Dozen, \$19.00

S N E L L C A R B I T S

Snell Extra No. 206

Snell Extension Lip No. 306

Snell Star No. 606

Snell Solid Center No. 806, 805

All the above are forged from crucible steel; full polished, except nib. Used by car builders because of their many excellent boring features and good chip clearance.

Price List—Nos. 206, 306 and 606

W I T H S C R E W, N o. 541

Forged from crucible steel; lacquered hollow, polished edge. These augers have been standard with ship builders for nearly a century and are the best known and the most used by all ship, dock and heavy timber workers; have heavy, square nib for use with auger handles or for welding to extension stems or to single or double crank handles; No. 542 is preferred where very accurate boring is essential as in ship yards, as they do not drift off with the grain.

These ship auger machine bits are commonly known as pneumatic or air augers, being used in machines operated by compressed air, also designed for use in electrically-driven machines.

For nearly a century the "Snell" name has stood for all that is best in ship auger construction. No other type can equal the Snell Single Twist, which is preferred and specified by ship, bridge and dock builders and for all heavy work where quality tools are essential.

All the above are Made to Order Only

List prices are same as those for Machine Bits on pages 23 and 24

STOCK SIZES OF SNELL MACHINE BITS

All machine bits in the following list are carried in finished stock and immediate delivery can be made:

Stock of No. 235 Double Twist Machine Bits

4-inch twist, $\frac{1}{2}''$ x $2\frac{1}{4}''$ shank, sizes by 16ths from $\frac{3}{16}$ to 1-inch.
 5-inch twist, $\frac{1}{2}''$ x $2\frac{1}{4}''$ shank, sizes by 16ths from $\frac{3}{16}$ to 1-inch.
 6-inch twist, $\frac{1}{2}''$ x $2\frac{1}{4}''$ shank, sizes by 16ths from $\frac{3}{16}$ to 2-inch.
 8-inch twist, $\frac{1}{2}''$ x $2\frac{1}{4}''$ shank, sizes by 16ths from $\frac{1}{4}$ to $1\frac{1}{8}$ -inch.
 10-inch twist, $\frac{1}{2}''$ x $2\frac{1}{4}''$ shank, sizes by 16ths from $\frac{5}{16}$ to $1\frac{1}{8}$ -inch.
 12-inch twist, $\frac{1}{2}''$ x $2\frac{1}{4}''$ shank, sizes by 16ths from $\frac{3}{8}$ to 2-inch.
 14-inch twist, $\frac{1}{2}''$ x $2\frac{1}{4}''$ shank, sizes $9/16$, $11/16$, $13/16$, $15/16$ and $1-1/16$ -inch.
 8-inch twist, $\frac{3}{4}''$ x $2\frac{1}{4}''$ shank, sizes by 16ths from $\frac{5}{16}$ to 1-inch.
 10-inch twist, $\frac{3}{4}''$ x $2\frac{1}{4}''$ shank, sizes by 16ths from $\frac{3}{8}$ to $1\frac{1}{8}$ -inch.
 12-inch twist, $\frac{3}{4}''$ x $2\frac{1}{4}''$ shank, sizes by 16ths from $\frac{3}{8}$ to 2-inch.
 14-inch twist, $\frac{3}{4}''$ x $2\frac{1}{4}''$ shank, sizes by 16ths from $\frac{3}{8}$ to 2-inch.
 16-inch twist, $\frac{3}{4}''$ x $2\frac{1}{4}''$ shank, sizes $9/16$, $11/16$, $13/16$, $15/16$ and $1-1/16$ -inch.

Stock of No. 335 Snell Extension Lip Machine Bits

4-inch twist, $\frac{1}{2}''$ x $2\frac{1}{4}''$ shank, sizes by 16ths from $\frac{1}{4}$ to 1-inch.
 6-inch twist, $\frac{1}{2}''$ x $2\frac{1}{4}''$ shank, sizes by 16ths from $\frac{1}{4}$ to $1\frac{1}{4}$ -inch.

Stock of No. 835 Snell Solid Center Machine Bits

6-inch twist, $\frac{1}{2}''$ x $2\frac{1}{4}''$ shank, sizes by 16ths from $\frac{1}{4}$ to $1\frac{1}{4}$ -inch.

Machine Bits of other specifications are Special Tools and must be made to order and figure at a higher cost basis.

To arrive at the list on special Machine Bits the list shown on pages 23, 24 is used but advanced on the following quantity extra basis:

1 of one size and type	double list
2 of one size and type	list plus two-thirds
3 of one size and type	list plus one-half
4 or 5 of one size and type	list plus one-third
6 to 11 of one size and type	list plus 20%
12 to 23 of one size and type	list plus 10%
24 or more of any size or type	regular list

Note on all machine bits there is no extra charge for turning shanks to any size required, provided they are straight and do not exceed 3 inches in length or $12/16$ -inch diameter. For shanks exceeding 3 inches in length an extra charge will be made of 7 cents per inch and if tapered, \$1.80 per dozen, net. Minimum charge 45 cents.

Morse taper shanks and special taper shanks to blue print, \$2.50 per dozen, net.

Special shanks of any desired shape made to order. We will not be held responsible for perfect fit unless we are furnished a sample shank of exact size desired.

All bits made by odd 32ds will be charged the price of the 16th larger.

SNELL MACHINE BITS

All are forged from crucible steel, oil tempered and full polished, in a variety of types as illustrated below.

The Snell No. 235 is always sent when no pattern is specified.

Snell Double Twist No. 235
Snell High Speed Double Twist No. 235 H. S.

Snell Extension Lip No. 335

Snell Ship Auger (Pneumatic Auger) No. 535 With Screw
No. 536 Without Screw

Snell Star Single Twist No. 635

Snell Solid Center No. 835

Snell Solid Center No. 838

Snell Solid Center No. 839

NOTE.—List prices for all the above are on following pages.

Note—No extra charge for turning shanks on machine bits to any size required, provided they are straight and do not exceed 3 inches in length or 12/16-inch diameter. For shanks exceeding 3 inches in length an extra charge will be made of 7 cents per inch and if tapered, \$1.80 per dozen, net. Minimum charge 45 cents.

Morse taper shanks and special taper shanks to blue print, \$2.50 per dozen, net.

Special shanks of any desired shape made to order. We will not be held responsible for perfect fit unless we are furnished a sample shank of exact size desired.

All bits made by odd 32ds will be charged the price of the 16th larger.
